

# New CONDUIT CARRIER

*The Gentili Conduit carrier is the ideal and reliable solution for installers, electricians, and maintenance technicians who need to safely transport copper pipes, plastic pipes, and other long, narrow materials on the roof of their vehicle.*

*Manufactured from high-quality anodized aluminum extrusion, it combines light weight with high strength and guarantees a long service life.*

*Thanks to its design, long and narrow objects can be stored neatly and securely, instead of being precariously fastened to the roof rack or loosely placed in the vehicle's cargo area.*

*With the Gentili Conduit carrier, sensitive materials such as copper pipes or plastic conduits are protected from damage or breakage, offering a safe, clean, and easily accessible storage space.*

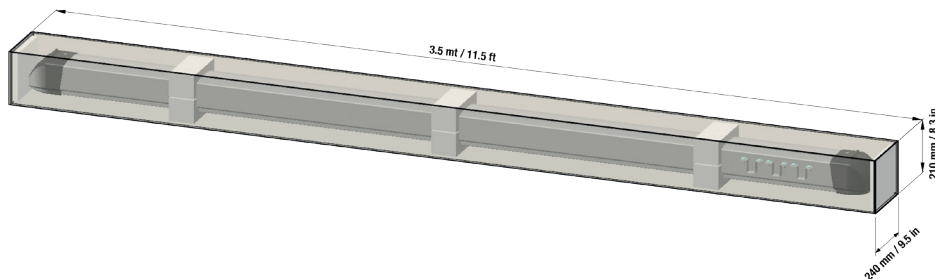

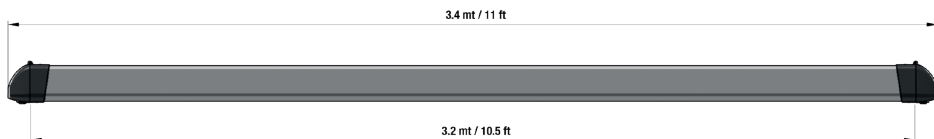

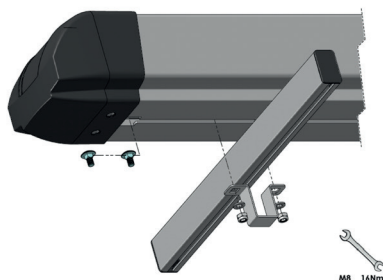

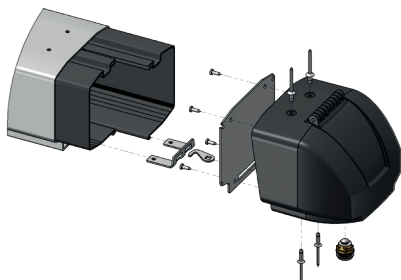

*Both ends are equipped with ABS caps reinforced with steel plates, ensuring extra stability and maximum protection of the contents.*

# TECHNICAL SPECIFICATIONS

- » *Extruded profile made of anodized aluminum, length 3.2 mt / 10.5 ft*
- » *Interior lined with extruded PVC profile*
- » *Double ABS cap with key-operated safety lock and internal steel reinforcement for accessing stored material from both the front and rear ends*
- » *Supplied with bracket and screw kit for fastening to Gentili's crossmembers*
- » *Easy installation, no drilling required*
- » *Packaged in a special box and internally protected with three polystyrene supports*
- » *High load capacity: useful internal space 146 mm / 5.7 in (width) x 94 mm / 2.7 in (height)*
- » *Weight: 19 kg / 42 lb*
- » *The Conduit carrier is made from a single aluminum profile, without the use of intermediate caps, to create an elegant and aerodynamic design*
